

Rackspace Government Solutions – Powering Innovation

Simplify the complexity of multicloud while addressing security and compliance requirements across the design, build, migrate, operate and optimize lifecycle. Rackspace Technology is your trusted partner across cloud, applications, security, data and infrastructure.

Benefits

Increase Business Agility

- Work with a team of unbiased and unrivaled cloud and security experts to assess your “current state” and develop a strategy and roadmap to securely transition data and applications to the cloud.
- Quickly launch scalable compliance-ready cloud environments across a multitude of cloud technologies and a world class portfolio of solutions.
- Accelerate secure SaaS solution deployment with secure, compliant-ready solutions and maintain compliance through continuous monitoring.
- Access and utilize cloud native tools to drive innovation and adoption of emerging technologies like Artificial Intelligence, Machine Learning and Zero Trust.

Optimize IT Time, Costs and Workforce Resources

- Shift budgets and resources from a CapEx model to an OpEx model.
- Shift tasks and workloads to a team of unparalleled cloud and security experts so you can focus on operational and mission-critical tasks.
- Lower costs with a consumption-based model that quickly scales up and down as needed – only pay for what you need.
- Accelerate time to FedRAMP Compliance or DISA ATO in just 3-6 months and up to 70% savings with 80% of FedRAMP security requirements addressed with Rackspace Inheritable Security Controls on Rackspace Government Cloud.

Reduce Risk and Meet Security and Compliance Standards

- Reduce the risk and stress to your workforce of monitoring and managing ever changing security & compliance requirements on your own .
- Focus your resources on being mission experts rather than security and compliance experts.
- Automate security and compliance requirements "in the cloud" not just around the cloud to improve cybersecurity posture from defensive to offensive.
- All-inclusive management & security including host-based intrusion protection; enhanced encryption appliances, dedicated load balancers, and DISA CAP connectivity.

Security & Compliance

- FedRAMP JAB authorized
- DoD CC SRG IL4 authorized
- DFARS/CMMC authorized
- FISMA High authorized
- NIST 800-53 Moderate Baseline
- NIST 800-171 DFARS ready
- CJIS, ITAR and FIPS 140-2 compliant
- HIPAA compliant
- 24x7x365 SOC, staffed by U.S. team
- TAC 2020 compliant
- IRS Publication 1075 compliant
- Always-available, secure business continuity disaster recovery capabilities measured in seconds
- A CMMC Registered Provider Organization (RPO)
